

ACS SYMPOSIUM SERIES 1152

Biochalcogen Chemistry: The Biological Chemistry of Sulfur, Selenium, and Tellurium

EDITED BY

Craig A. Bayse and Julia L. Brumaghim

US-China collaborative research published by Eric Block and colleague, Hanyi Zhuang. As a recipient of a Chinese Academy of Sciences Visiting Professorship for Senior International Scientists, Block spent the month of October 2013 on sabbatical in Shanghai. While in China, Block collaborated with Prof. Hanyi Zhuang at the Shanghai Jiao Tong University School of Medicine, conducting research on olfaction. This work is described in part in Block's chapter in this book, which was the subject of his lecture at a recent ACS National Meeting.
