ABOUT SEXUALITY MONTH 2019

During the 36 years that Sexuality Month has been in existence at the University at Albany, college students across the nation have been faced with critical issues and choices. Concerns related to gender and sexuality, HIV/AIDS and other sexually transmitted infections, relationships, identity, and reproductive health have remained at the forefront across time.

In recognition of the importance of the above issues for students, the content of programs within Sexuality Month reflects these key themes. In this way, we hope to meet the needs of our students as well as to provide a retrospective and prospective look at the issues.

All programs listed in this brochure will be presented or supervised by individuals with expertise in the topic area. We hope the information that will be presented will encourage learning, dialogue, and critical thinking, and will continue to move Middle Earth forward in its mission of prevention and the promotion of health.
