Advancing Cultural Competence

Certificate Program Mission and Description

Mission

The Advancing Cultural Competence (ACC) Certificate provides cutting-edge cultural competence continuing education through free, self-paced, online courses.

Target Audience: The certificate is designed for health professionals, but open to anyone.

Program Description

Through 12.5 hours of online coursework, the ACC Certificate prepares participants to recognize how the conditions of daily life, sociopolitical forces, and the culture of medicine affect health among underserved racial and ethnic groups in New York and other regions of the United States. Participants will be empowered to transform their professional practice and yield positive health impacts at the population health level or one-on-one in clinical settings through personal reflection exercises and practice-based strategies.

Each online course covers the following four themes:

1. Historical frames of oppression
2. Present day sociopolitical barriers and challenges to health
3. Engagement with activists and advocates within the community around health
4. Clinical cases and practical tools for advancing cultural competence

Advancing Cultural Competence
