The Certificate of Graduate Studies in International Education Management provides early career professionals as well as mid-career administrators a concise, in-depth, coherent understanding of cutting edge issues and recent developments in international education management as embedded within the administration and financing of higher education institutions, as well as other organizations, agencies and enterprises.

A PRACTICAL CURRICULUM

Through coursework students will acquire foundational knowledge of international education systems (including comparative educational systems, student development, cross cultural communication, evaluation and assessment) and specialized knowledge in selected areas of operational management (consisting of competencies in institutional governance and administration, budgeting and finance, risk assessment and management, marketing, and program development). Students develop specific skills in international office operations, strategic planning, marketing, program development, and budgeting, with a focus on international education systems and operational management.

FACULTY

Students learn from renowned, visionary, and multi disciplinary researchers, policy analysts, and educational leaders engaged in capacity building activities across the globe. All faculty members have doctorates and collectively provide a valuable mix of academic and practical experience in all levels of school and institutional leadership, higher education, private sector education and policy analysis.
