#### Part 1 – General

- Reference : [UA Signage Manual](#)
- Section includes interior building signage and way finding.
- Wall-mounted sign products that use clear plastic faces with information displayed behind the cover or sub-surface printed for protection.
- Designs promote changeability and allow the University to control production of the inserts.
- Vinyl lettering is used for overhead sign types and ink-jet printed elements are used in some instances where they can fit behind a protective cover.

#### Part 2 – Product

- Basis of Design Product: APCO Sign's Accord 15 modular extruded signs
