UPD	24x7						

**Notes:**

The AHU operating schedule will be adjusted to match the occupancy schedule above such that the building is maintained at occupied temperature during occupied hours.

The occupied hour summer setpoint is 76F and the unoccupied hour summer setpoint is 80F.

The occupied hour winter setpoint is 68F and the unoccupied hour winter setpoint is 55F.

Some AHU may need to remain on 24/7. Please email [iinu@albany.edu](mailto:iinu@albany.edu) if this is the case.

Stagger start/stop time to avoid sudden changes in electrical demand as well as chiller/boiler load.
