Courses in Planning

Graduate Courses

A Pln 556 (=A Gog 596)
Geographic Information Systems (3)
This course will explore the structure, design, and application of geographic information systems. The student will learn how to store efficiently, retrieve, manipulate, analyze, and display large volumes of spatial data derived from various sources. Students will learn information management techniques for a variety of purposes including planning and simulation modeling. Prerequisites: Gog 101 or 290, or permission of instructor, and familiarity with maps and coordinate systems.
