The Sustainability Coordinators meet on the first Tuesday of each month from 12-1 pm in AS 122.

Reminders: [1] The Office of Sustainability has created several Sustainability Coordinators logo options. Please vote for your favorite choice! [2] In an effort to reduce paper consumption at Sustainability Coordinators meetings, the Office of Sustainability has created a Blackboard page with available digital resources. It is located under the “Community” tab.

- April 4 - Campus Conversations in the Standish: Dr. Kendra Smith-Howard “Finding Nature in Unexpected Places” – 12:35-1:30 pm in the Standish room, Science Library

**Upcoming Volunteer Opportunity:** Assist the Office of Sustainability with Give & Go move out program sorting throughout the month of May! The schedule will be posted soon.

**Professional Development Opportunities**
- The Office of Sustainability is currently recruiting department representatives to serve on the Sustainability Coordinator's Committee. Our goal is to have a participant from every division and major department on campus. If you know of a good candidate, please email gogreen@albany.edu.
- Co-host a “Speak Sustainability” lunch series about getting involved in the sustainability movement as a staff member.
- As we are updating the coordinator’s database, please make sure your supervisor[s] are listed correctly so we know who to send a letter of recognition at the end of the academic year. The database is on our Blackboard page.

**Recognition**

**Terra Awards** - recognizes a student, faculty and a staff member for innovation in sustainability on campus

*You can find the above form at albany.edu/gogreen “Featured Tab” on the homepage.

**Hudson Valley Heat Pump Project:**
This project installs cold climate air source heat pumps in 20 homes in the Hudson Valley area including real-time data monitoring to assess how well the heat pumps are performing. There are some project requirements such as the house must be relatively air sealed and insulated, and ideally would be electric resistance or oil or propane heat currently. If interested, please email Mary Ellen.
