

University At Albany's 12th Annual

Energy Campaign

SEPTEMBER 5TH

NOVEMBER 11TH

It's time for the Energy Campaign! We are looking to hit a 10% reduction of the electricity baseline across campus this year. In Fall 2017, the University at Albany had a 248.66 ton reduction of CO₂ emissions. This is equivalent to designating 13 people on campus as carbon neutral, taking 106 cars off the road, or the carbon sequestered by 584 acres of US forests in 1 year!

Save water
to save
energy.

Be on the lookout for water conservation tips throughout the Energy Campaign!

#UAlbanyEnergy

Remember to participate in **Take the Stairs Tuesdays** as well as **Power Down Fridays!**

You've got the power-
to conserve!
