The School of Public Health offers an education based on cutting-edge research and practice-based education. A unique partnership with the New York State Department of Health enables students to observe and help address public health problems as they occur, using some of the largest databases in the world, working directly with experts in the field, and accessing the most technologically advanced laboratory complexes in the country.

We are nationally known for our commitment to experiential learning. Our Master of Public Health program requires more internship hours than any other program in the nation. And our MS, PhD and DrPH students also gain extensive hands-on experience, including laboratory research in the renowned Wadsworth Center. Our location in the capital of New York State provides real advantages. As the seat of government for one of America’s largest and most diverse states, the city of Albany and its surrounding communities provide many opportunities to work closely with policy makers, public health practitioners, non-profit organization and clinicians, as well as access to a wide range of internships, field placements and job opportunities.

Our commitment to providing students with lots of “real-world” experiences greatly accelerates their careers as practice-ready graduates who are highly sought after by employers – many of whom are themselves UAlbany alumni.

“I HAD AN AMAZING EXPERIENCE AT THE SCHOOL OF PUBLIC HEALTH. BETWEEN THE ENGAGED PROFESSORS, INTERNSHIP EXPERIENCES, AND THE VARIOUS PROFESSIONAL OPPORTUNITIES OFFERED, I RECEIVED AN EDUCATIONAL EXPERIENCE THAT WAS COMPREHENSIVE AND GAVE ME AN EXCELLENT FOUNDATION FOR WORK IN THE FIELD.”

MARNI RAWISZER, MPH ‘16

WHAT IS PUBLIC HEALTH?

Public Health is the science of protecting and improving the health of communities through education, promotion of healthy lifestyles, and research for disease and injury prevention. Public health professionals analyze the effect on health of genetics, personal choice, and the environment in order to develop programs that protect the health of families and the community.
