You diversify your investment portfolio before retirement to help offset risk. A similar strategy can help see you through retirement. Learn how creating a diversified income plan—one that uses a combination of income sources and includes annuity income that's guaranteed for life—can help reduce the risks you may face in retirement and ensure you have income that never runs out.

Register today for this live webinar on Tuesday, April 20, 2021, 11 a.m. to 12 p.m. (ET)

Featured speaker:

Benjamin (aka Benny) Goodman is a Fellow of the Society of Actuaries (FSA) and a Member of the American Academy of Actuaries (MAAA). He is a Vice President at TIAA with 30 years of financial industry experience.

Benny has been with TIAA since 1988, and has served in a variety of actuarial positions, including managing the Actuarial Consulting Services area with a focus on pension plan design and meeting individual retirement income needs. Benny has been a featured speaker at numerous institutional seminars and webinars on the topic of lifetime income.
Paycheck refers to the annuity income received in retirement. Guarantees of fixed monthly payments are only associated with TIAA’s fixed annuities.

Diversification is a technique to help reduce risk. It is not guaranteed to protect against loss.

Annuities are designed for retirement and other long-term goals. They offer several payment options, including lifetime income. Guarantees are based on the claims-paying ability of the issuer. However, payments from variable annuities are not guaranteed and the payment amounts will rise or fall depending on investment returns. If you choose to invest in variable investment products, your money will also be subject to the risks associated with investing in securities, including loss of principal. The value of a variable annuity is subject to market fluctuations and investment risk so that, if withdrawn, it may be worth more or less than its original cost.
