SOIS of Standard Face-to-Face Courses - Comments Fall 2007

Alexandrova, Iv (36-MATH)

<i>Course name</i>	<i>Comment 1 - Strengths</i>	<i>Comment 2 - Suggestions</i>	<i>Comment 3 - Additional Comments</i>
MATH 2173-001 (008)	The teacher knew what she was teaching. She explained it in great detail in words and with examples.	Nothing!	She is a very helpful teacher and is there for the students in any way possible. She wanted us to succeed in her class. Overall she was a great professor.
MATH 2173-001 (008)			Dr. Alexandrova was very clear and precise on everything we covered in the class and was very helpful when I would come to her office. I only wish she was teaching next semester.
MATH 2173-001 (008)	Just as the first two calculus' depend on the instructor so does the third. Prof. alexandrova has gone far and beyond to clarify material.	I would prefer 4 tests instead of 3.	I love calculus at ecu. Alexandrova has become by favorite teacher.
MATH 2173-001 (008)	Dr. Alexandrova is excellent at teaching this course. I do not feel that there is any other professor who could have taught the material better. I also really liked the small class; I learned the material much better in this setting.	Let this class meet in a room that either has a dry-erase board or a SmartBoard. It was so hard to see some of the 3-D drawings in chalk and erasing the board was a pain in the neck.	Wonderful course!!!
MATH 4101-001 (008)			Wonderful teacher!!!! Knows the full meaning of her profession. I would take every class taught by her. Thanks for it all!!!
MATH 4101-001 (008)			She is the only professor that I've had at ECU that actually teaches you the material rather than just telling it to you. She is by far the best teacher that I've had since I've been at ECU.
MATH 4101-001 (008)	The instructor is one of the best I have had in the math department. Very clear, easy to understand. Also, objectives are clear and grading has been fair. I really like that we are given solutions to the homework and tests so that we can correct.	It seemed like more explaining was done in the beginning of the course and I understood those concepts better. Towards the end, I felt that there was less explanation for what we were doing.	I liked the study guides and being made to go up to the board (even when I didn't want to). I became more confident and understood the material better.
MATH 4101-001 (008)	The professor, she explains concepts thoroughly and make sure that the students can understand. I have taken this class before and I feel that this instructor was better at making me understand the material.	nothing
