Course: Intro to Complex Variables

Student Opinion of Instruction Survey

Standard Face-to-face Course

Instructor: Alexandrova, Ivana M.

MATH 6111, Section 001, Campus 008

Fall 2008

Department: AA Math

Campus: Main Campus

(Rate: 8/8=100%)

Frequency Distribution of Responses (1=Strongly Disagree, 7=Strongly Agree, NA=No Opinion/Not Applicable, NR=No Response)

Summed Scales Statistical Information:

	This Course				Unit Norm*				University Norm**			
	N	Mean	Median	Std	N	Mean	Median	Std	N	Mean	Median	Std
Questions 1 - 16 (except item 7)												
Based on individual summed scores	8	97.63	100.00	8.25	8	97.63	100.00	8.25	1403	94.90	101.00	15.09
Based on individual mean scores	8	6.51	6.67	0.55	8	6.51	6.67	0.55	1809	6.23	6.67	1.07
Questions 17-18 (summed scores basis)	8	9.63	9.00	1.60	8	9.63	9.00	1.60	1772	10.27	10.00	2.55
Question 19 (mean scores basis)	8	6.75	7.00	0.46	8	6.75	7.00	0.46	1790	6.12	7.00	1.40

\* Unit Norm reflects the mean, median, and standard deviation for all courses in this unit at this course level.

\*\* University Norm reflects the mean, median, and standard deviation for all courses at ECU at this course level.

Note: Response rate numerator may include students who only made comments; rate may not reflect late adds/drops.

SOIS of Standard Face-to-face Courses - Comments Fall 2008

Course Name	Question 24 - Strengths	Question 25 - Suggestions	Question 26 - Additional Comments
MATH 6111 001 (008)	Very helpful teacher, clear teaching style.	Maybe offer it earlier in the day.	Would recommend this instructor for a class.
MATH 6111 001 (008)	The teacher moves at a great pace for learning and is enthusiastic and teaches the material in a way so that everyone can understand.	Not a lot other than the time the class starts.	The teacher is very effective and teaches at an excellent pace. She is not over demanding grades fairly. She tells the expectations very clear in what she wants/expects.
MATH 6111 001 (008)	Dr. Alexandrova is a great teacher. She does show patience and moves at a nice pace for the average student. She tries to make sure everyone understands the material.	Perhaps, with some things in complex analysis, a real world representation or a visual breakdown of some processes would have been helpful in making better understanding the material.	
MATH 6111 001 (008)	I think this is a great course in the introduction of complex variables and complex analysis.		
MATH 6111 001 (008)	Course is organised very logically and contains enough examples for better understanding. Instructor gives lectures clearly with good oral and board presentation.	Nothing	Thank you very much for nice time with my instructor, Ivana M. Alexandrova. A pleasure to see good lecturer in class.
