OVERVIEW
The 14th Annual Symposium on Information Assurance (ASIA ’19) will be held in conjunction with the 22th New York State Cyber Security Conference (NYSCSC) on June 4-6, 2019 at the Empire State Plaza. This three-day event is expected to attract well over 1,000 participants including practitioners, researchers, and vendors providing opportunities for business and intellectual engagement among attendees. The Symposium is organized by the School of Business and the Forensic Analytics for Complex, Energy and Transportation Systems (FACETS) Center at the University at Albany, State University of New York, the Enterprise Information Security Office (EISO) of the NYS Office of Information Technology Services (ITS), and the NYS Forum. Through generous sponsorships, we are able to have free registration for all selected presenters, authors of accepted papers, and members of government organizations. There is a modest fee of $50 for not-for-profit attendees and $200 for private registrants. All participants in ASIA will also be able to attend other NYSCSC sessions that typically cover practical applications of information security. Authors are invited to submit papers in information assurance and security for (but not limited to) these topics:

Organizational Security

Technological Security

Incident Response and Forensics

International Security Issues

Security and Forensics Education
Security and Forensics Accreditation, Innovative Pedagogic Techniques, Certifications, Hands-on Security Laboratories and Table Top Exercises, Education Infrastructure, Diversity in Security/Forensics Education, and Online Security/Forensics Education.
