Thursday, Oct. 10, 2019; 11:45am-1:00pm; Classroom 4 (C-4)

Join the Center for Global Health for this very special “student-led” seminar. Hear from students who have recently returned from Global Health Field Placements or International Internships. These students will discuss their experiences abroad addressing critical global health challenges in Uganda, China, and Ireland. Their personal stories will demonstrate how experiences abroad greatly shape one’s view of public health from a global perspective.

All interested students are welcome.

Pizza and soft drinks will be provided by the CGH!
