§ 240. Scaffolding and other devices for use of employees. 1. All contractors and owners and their agents, except owners of one and two-family dwellings who contract for but do not direct or control the work, in the erection, demolition, repairing, altering, painting, cleaning or pointing of a building or structure shall furnish or erect, or cause to be furnished or erected for the performance of such labor, scaffolding, hoists, stays, ladders, slings, hangers, blocks, pulleys, braces, irons, ropes, and other devices which shall be so constructed, placed and operated as to give proper protection to a person so employed.

No liability pursuant to this subdivision for the failure to provide protection to a person so employed shall be imposed on professional engineers as provided for in article one hundred forty-five of the education law, architects as provided for in article one hundred forty-seven of such law or landscape architects as provided for in article one hundred forty-eight of such law who do not direct or control the work for activities other than planning and design. This exception shall not diminish or extinguish any liability of professional engineers or architects or landscape architects arising under the common law or any other provision of law.

2. Scaffolding or staging more than twenty feet from the ground or floor, swung or suspended from an overhead support or erected with stationary supports, except scaffolding wholly within the interior of a building and covering the entire floor space of any room therein, shall have a safety rail of suitable material properly attached, bolted, braced or otherwise secured, rising at least thirty-four inches above the floor or main portions of such scaffolding or staging and extending along the entire length of the outside and the ends thereof, with only such openings as may be necessary for the delivery of materials. Such scaffolding or staging shall be so fastened as to prevent it from swaying from the building or structure.

3. All scaffolding shall be so constructed as to bear four times the maximum weight required to be dependent therefrom or placed thereon when in use.
§ 241. Construction, excavation and demolition work. All contractors and owners and their agents, except owners of one and two-family dwellings who contract for but do not direct or control the work, when constructing or demolishing buildings or doing any excavating in connection therewith, shall comply with the following requirements:

1. If the floors are to be arched between the beams thereof, or if the floors or filling in between the floors are of fireproof material, the flooring or filling in shall be completed as the building progresses.

2. If the floors are not to be filled in between the beams with brick or other fireproof material, the underflooring shall be laid on each story as the building progresses.

3. If double floors are not to be used, the floor two stories immediately below the story where the work is being performed shall be kept planked over.

4. If the floor beams are of iron or steel, the entire tier of iron or steel beams on which the structural iron or steel work is being erected shall be thoroughly planked over, except spaces reasonably required for proper construction of the iron or steel work, for raising or lowering of materials or for stairways and elevator shafts designated by the plans and specifications.

5. If elevators, elevating machines or hod-hoisting apparatus are used in the course of construction, for the purpose of lifting materials, the shafts or openings in each floor and at each landing level shall be inclosed or fenced in on all sides by a barrier of suitable height, except on two sides which may be used for taking off and putting on materials, and those sides shall be guarded by an adjustable barrier not less than three nor more than four feet from the floor and not less than two feet from the edges of such shafts or openings.

6. All areas in which construction, excavation or demolition work is being performed shall be so constructed, shored, equipped, guarded, arranged, operated and conducted as to provide reasonable and adequate protection and safety to the persons employed therein or lawfully frequenting such places. The commissioner may make rules to carry into effect the provisions of this subdivision, and the owners and contractors and their agents for such work, except owners of one and two-family dwellings who contract for but do not direct or control the work, shall comply therewith.

7. The commissioner may make rules to provide for the protection of workers in connection with the excavation work for the construction of buildings, the work of constructing or demolishing buildings and structures, and the guarding of dangerous machinery used in connection therewith, and the owners and contractors and their agents for such work, except owners of one and two-family dwellings who contract for but do not direct or control the work, shall comply therewith.

8. The commissioner, as deemed necessary, shall promulgate rules designed for the purpose of providing for the reasonable and adequate protection and safety of persons passing by all areas, buildings or structures in which construction, excavation or demolition work is being performed, and the owners and contractors and their agents for such work, except owners of one and two-family dwellings who contract for but do not direct or control the work, shall comply therewith. The provisions of this subdivision shall not apply to cities having a population of one million or more.

9. No liability for the non-compliance with any of the provisions of this section shall be imposed on professional engineers as provided for in article one hundred forty-five of the education law, architects as provided for in article one hundred forty-seven of such law or landscape architects as provided for in article one hundred forty-eight of such...
law who do not direct or control the work for activities other than planning and design. This exception shall not diminish or extinguish any liability of professional engineers, architects or landscape architects arising under the common law or any other provision of law.

10. Prior to advertising for bids or contracting for or commencing work on any demolition work on buildings covered under this section except agricultural buildings as defined in regulations promulgated by the commissioner and except buildings the construction of which was begun on or after January first, nineteen hundred seventy-four, all owners and their agents, except owners of one and two-family dwellings who contract for but do not direct or control the work, shall conduct or cause to be conducted a survey to determine whether or not the building to be demolished contains asbestos or asbestos material as defined in section nine hundred one of this chapter. Such surveys shall be conducted in conformance with rules and regulations promulgated by the commissioner. Information derived from such survey shall be immediately transmitted to the commissioner and to the local governmental entity charged with issuing a permit for such demolition under applicable state or local laws or, if no such permit is required, to the town or city clerk. If such survey finds that a building to be demolished contains asbestos or asbestos material as defined by section nine hundred one of the chapter, no bids shall be advertised nor contracts awarded nor demolition work commenced by any owner or agent prior to completion of an asbestos remediation contract performed by a licensed asbestos contractor as defined by section nine hundred one of this chapter.
§ 241-a. Protection of workmen in or at elevator shaftways, hatchways and stairwells. Any men working in or at elevator shaftways, hatchways and stairwells of buildings in course of construction or demolition shall be protected by sound planking at least two inches thick laid across the opening at levels not more than two stories above and not more than one story below such men, or by other means specified in the rules of the board.
§ 241-b. Marking of transparent glass doors required. All transparent glass doors in mercantile establishments and in public and commercial buildings and structures shall be marked in such manner as shall be calculated to warn persons using the same that such doors are glass doors. The board shall make such rules as it may deem proper or necessary to carry into effect the provisions of this section.
§ 242. Application and enforcement of article. Notwithstanding any other law or regulation, local or general, the provisions of this article and the rules issued thereunder shall be applicable exclusively throughout the state and the commissioner shall have exclusive authority to enforce this article and the rules issued thereunder.
