Licensing Roundtable and Training Workshops-Ukraine

The GOU would benefit from assistance with the development of a national STC training program, particularly one that focuses on strategic trade licensing. Therefore, RF SUNY/CPR proposes a three-part outreach engagement consisting of an initial consultation with relevant GOU agencies in Kiev, a “train-the-trainer” (TTT) roundtable for up to 15 Ukraine STC officials in Kiev, and finally, an opportunity to observe a live training under the new training program. The proposed TTT roundtable and training materials developed will cover all facets of strategic trade licensing, from the detailed procedures for license application review, to risk assessment, to coordination with enforcement agencies and industry on licensing-related matters. From this project, the GOU will receive the framework and ingredients to build its own indigenous STC training curriculum and approach.
