Note: Administrative facilities are institutions with special missions, such as the detention of pretrial offenders, the treatment of prisoners with serious or chronic medical problems, or the containment of extremely dangerous, violent, or escape-prone prisoners. Administrative facilities are capable of holding prisoners in all security categories.

^aThese minimum security satellite camps are adjacent to the main facility. A blank indicates no camp facility. Except where noted, the sex of prisoners housed in the camp and main facility is the same.

^bThis facility is undergoing a mission change.

^cFederal Correctional Complexes (FCCs) are comprised of multiple facilities with different security levels and varying missions and are located in close proximity to one another. The staff and prisoner counts shown are totals for the entire complex; the Source did not provide breakdowns for individual facilities. All the FCCs with the exception of Allenwood also operate minimum security camps. Facilities comprising the FCCs may have been established over the course of several years therefore the "year opened" entry may be multiple years or a span of years in the case of three or more facilities opening over a period of several years.

^dThe adjacent camp is a minimum security facility for females.

^eThis facility operates a Special Confinement Unit for prisoners under Federal death sentence.

^fThis facility houses medium security males and administrative security males and females. High security activation is underway.

^gThis facility houses low security females and administrative security males.

^hFigure includes prisoners housed in a low security satellite facility adjacent to or affiliated with the main institution.

ⁱLocated on the New Mexico-Texas border.
