Note: These data are from the Census of Juveniles in Residential Placement, conducted biennially by the U.S. Department of Justice, Office of Juvenile Justice and Delinquency Prevention. Public and private facilities, secure and nonsecure, that hold alleged or adjudicated juvenile delinquents or status offenders are asked to provide information on each juvenile in residence on a specified reference date. Facilities are asked to include all juveniles under 21 years of age assigned a bed in the residential facility on the reference date as a result of being charged or court adjudicated for an offense. The reference date for each census was the last Wednesday in October of each year except for 2006 when the reference date was February 22. The facility response rate for the 1997 census was 96%; for the 1999 census it was 100%; for the 2001 census it was 99%; and for the 2003 and 2006 censuses it was 100%. These data reflect the State where the offense was committed rather than the State in which the holding facility is located.

^aDetail may not add to total because of rounding.

^bTotal includes 1,466 juvenile offenders in private facilities for whom the State where the offense was committed was not reported.
