

Foundations of Public Health

Foundations of Public Health Certificate

This basic introductory certificate provides foundational knowledge for public health workers with limited formal education or training in public health. These courses are offered via distance learning (self-paced, online course format). It does not offer academic credit, however, many of the courses provide continuing education credits.

Who should register?

Public health employees in local health departments and the NYS Department of Health are eligible to participate with permission from their supervisor.

What are the requirements and costs?

Participants must register for the certificate and complete requirements as laid out in the course curriculum. Instruction and materials are provided at **no charge**.

When can I register?

Now! Please [click here](#) or visit the [NYS Department of Health Learning Management System](#) and select **Foundations of Public Health Certificate Program**.

Foundations of Public Health

Are you a Nurse?

Then you should check out Public Health Nurse Ready (PHN Ready), an online certificate program featuring courses designed to enhance the skills of RNs and LPNs working in public health.

For more information about PHN Ready, please visit:
www.phnready.org
