The Living-Learning Community application will become available to you when you apply for housing and Orientation as of early May.

**Applying is as easy as 1 - 2 - 3!**

1. Select the L-LC(s) you would like to join from the list of available communities for next fall.
2. Select your intended major (including “undecided”), so that the staff in Student Engagement can be sure your preferred and selected L-LC(s) will be a good fit for you academically.
3. Tell us why you would like to be a member of the L-LC you have chosen and how you can contribute to that community. You must agree to be active and engaged for the duration of your freshman year; the L-LC experience lasts for the fall and spring semester.

**Students who are selected to be members of their chosen L-LC will be notified via their University at Albany e-mail beginning mid-June.**

Questions about the L-LCs can be directed to Student Engagement at studentengagement@albany.edu.

General questions about housing and roommate assignments can be directed to the Department of Residential Life at reslife@albany.edu.

---

"Friendships are forged because of the L-LC, academic work gets done within the community, and a smooth transition from the ‘high school mindset’ to the ‘college mindset’ takes place naturally.”

- Former World Ambassador

---

The Office of the Vice Provost for Undergraduate Education works to provide opportunities and pathways for students to be active and engaged in their studies, both inside and outside the classroom.
The World of Science: Fact and Fiction

The World of Science: Fact and Fiction is designed for incoming freshmen who are interested in all areas of science including understanding the universe, and the science that can change industries like robotics, clean energy, and medical imaging. Members of the World of Physics and the Environment will socialize with like-minded peers, learn more about the field and related career paths, and be introduced to scholars with active and expanding research programs at the University at Albany in areas such as string theory, quantum theory, biophysics, and more. Members of the World of Physics and the Environment will participate in a variety of social and academic activities, such as:

- Organized tours of research laboratories
- Review sessions and study groups for your science classes
- Social gatherings with your friends, such as physics competitions and game show events
- Research seminars and guest speakers
- Opportunities to get involved in science clubs

Living

As a member of the World of Science: Fact and Fiction, you will live with other incoming freshmen who share your interest in science and its impact on the world.

Learning

You will take one or two of your classes together in the fall and spring semesters of your freshman year and attend co-curricular events together as a community.

Community

As a member of an L-LC, you will have a built-in community of friends from the start!

Friends: Study and socialize with fellow L-LC members. Tackle those first-year courses with your friends by forming study groups where you live!

World Ambassadors: “Learn the ropes” from peers selected from last year’s most engaged L-LC students.

Community Assistant: Meet weekly with an upper-class/graduate student to plan or attend social, academic, and community service events.

Lead Faculty Member: Get to know a member of the faculty outside of the classroom at meals in your own dining hall!

Academic Advisor: Each L-LC has its own Academic Advisor to help you plan your pathway to success.

Leadership Opportunities: Become a World Representative. Go on to assume a campus-wide leadership role.

Recent national studies have shown that living-learning communities positively impact student success!

Faculty interaction outside the classroom is directly linked to student satisfaction and enhanced learning.

For more information about the World of Science: Fact and Fiction, including classes and activities, or to learn more about the responsibilities of being in an L-LC, please visit our website.
