

General Error Codes (0 to -99)

Error Code	Description
0	Successful operation. No error encountered.
-1	Error when attempting to open a file. The Sqllog jhost returns this value when it fails through the Cashiering application.
-2	Error when attempting to read an open file
-3	Error when attempting to seek to a position within an open file
-4	Error when attempting to allocate memory
-5	Invalid tag found in data (audio files, image files, HTTP response, SSL response, etc...) Internal transmgr error
-6	Not currently used
-7	Requested item not found
-8	Required input or output data is missing
-9	Required parameter missing or invalid parameter specified
-10	Unable to write to a file; Can occur because of low disk space
-11	Error creating subprocess
-12	Response not received before timeout expired
-13	Generally used by data providers to indicate that invalid data was returned from a remote client
-14	Internal error code indicating that invalid file information was sent to a read or write call
-15	Disk drive hardware failure
-16	Usually caused by an unexpected error returned by an OS specific API
-17	Invalid request attempted.
-21	Value does not fall into the range of allowable values
-22	Table contains no key entries
-23	No server connected to transmgr to process the specified transaction
-24	Requested operation not allowed. Check the trxattrs.txt and clientid.txt
-25	Request made to add a new entry to a table that already contains the requested key
-26	Client request would exceed the maximum allowed number of requests

Proxy specific error codes

Error Code	Description
-16xx	Credit Card Processor Error
-1699	Returned by SCT PLUS2000 system for credit card not accepted

Processor independent payment errors (-1700 to -1799)

Error Code	Description
-1701	Required value not found in config file
-1702	Card data not present or failed Luhn check digit
-1703	Generic bad authorization error
-1704	Generic bad settlement error
-1705	Start signal not sent by provider (modem)
-1706	No configuration file found
-1707	response not received before timeout
-1708	Maximum number of retries exceeded
-1709	character not received before timeout
-1710	Unsupported transaction requested
-1711	Bad write to settlement batch file

-1712 Bad read from settlement batch file
-1713 ETX not received
-1714 Generic modem processing failed error
-1715 Modem was unavailable
-1716 bad LRC received
-1717 Modem dial failed
-1718 Modem write failed
-1719 Modem read failed
-1720 Invalid response received
-1721 Batch settle failed because of bad record
-1722 Processor determined that batch is duplicate
-1723 Processor requests batch be resent
-1724 Address verifcaiton failed
-1725 Card expired
-1726 Batch out of balance
-1727 Invalid amount specified
-1728 Reversal not allowed for this transaction
-1729 Operation attempted on previously voided transaction
-1730 Operation is not valid for this transaction (i.e. credit on item that has not been batched)
-1731 Bad settle, error determined by clearinghouse
-1732 ACH agreement not found
-1733 ACH routing number not found
-1734 Operation not allowed for transaction
-1735 Trans Reinitiated too many times.
-1736 Proxy does not allow settle now.
-1737 Request sent for unlicensed merchant; Can occur in Cashiering if an incorrect subtrancode is used.
-1738 Used to prevent debit, credit, or ach transactions
-1739 Only transactions with a valid rejection code are to be rejected.
-1740 Only one batch settlement can be processed at a time
-1741 Cvv2 invalid and restrict on cvv2 enabled
-1742 ACH Transations must have a valid origin or SEC code. Can occur in Cashiering when running an checkst4.dll version prior to 4.7.3 and attempting a TEL check payment.
-1743 In ACH only three SEC codes can allow savings transations
-1744 STX not received
-1745 Request contained characters that could not be put in an ACH file
-1746 BIN File could not or did not get loaded properly
-1747 Restricted list could not or did not get loaded properly
-1748 The ACH Account was found in the restricted list
-1749 Used when an ACH is not found in the restricted list
-1750 Auth is being declined due to failed Verified By Visa authentication
-1751
-1752 Configuration error. Customer should contact TouchNet.
-1753 Configuration error. Customer should contact TouchNet.
-1754
-1755 Cashback is not available
-1756 Amount exceeds cashback limit
-1757 Account is temporarily locked out due to too many failures

-1758	Generic Invalid Account Data
-1759	Invalid LUHN on Account Number
-1760	Invalid Account Number
-1761	Invalid Expiration Date
-1762	Invalid PIN
-1763	Too many PIN failures
-1764	Insufficient Funds
-1765	Exceeds amount, count, or time limit
-1766	Amount exceeds withdrawal limit
-1767	Trans exceeds frequency limit
-1768	Pickup the card if possible
-1769	Pickup the card if possible
-1770	Pickup the card if possible
-1771	Pickup the card if possible (unknown reason)
-1772	REFERRAL: Call Issuer for verbal auth
-1773	Transaction possibly approved for lesser amount
-1774	Batch is not ready to be settled
-1775	Batch is empty
-1776	The ACH file was not found in the database
-1777	Generic authorization failed error
-1778	Generic authorization failed error

General Error Codes (-2900 to -2932)

Error Code	Description
-2900	
-2901	Error when attempting to open a file
-2902	Error when attempting to read an open file
-2903	Error when attempting to seek to a position within an open file
-2904	Error when attempting to allocate memory
-2905	Invalid tag found in data (audio files, image files, HTTP response, SSL response, etc...) Internal transmgr error
-2906	not currently used
-2907	Requested item not found
-2908	Required input or output data is missing
-2909	Required parameter missing or invalid parameter specified
-2910	Unable to write to a file; Can occur because of low disk space
-2911	Error creating subprocess
-2912	Response not received before timeout expired
-2913	Generally used by data providers to indicate that invalid data was returned from a remote client
-2914	Internal error code indicating that invalid file information was sent to a read or write call
-2915	Disk drive hardware failure
-2916	Usually caused by an unexpected error returned by an OS specific API
-2917	Invalid request attempted. Transaction was directed to a module that does not process that transaction
-2918	Unable to open previously created semaphore (not used)
-2919	Unable to create new semaphore (not used)
-2920	Semaphore lock request not completed before timeout expired (not used)

-2921 Unable to find window (used by TNSurf)
-2922 Unable to copy buffer (no longer used)
-2923 Buffer is too small to contain the data
-2924 COM port is not responding to commands
-2925 General TouchNet API error
-2926 Token dispenser is empty (no longer used)
-2927 Token dispenser was refilled (no longer used)
-2928 Exception caught
-2929 Function is not implemented
-2930
-2931 Unable to parse URL
-2932
