APPLICATIONS FOR POSTERS ON THE HILL ARE OPEN THROUGH NOVEMBER 5

TO FIND OUT MORE, VISIT:
https://wwwCUR.org/what/events/students/posters_on_the_hill_2020
We spoke with Dr. Kohn who runs biomedical research projects at the Wadsworth Center: "Wadsworth hosts an NSF-funded Research Experiences for Undergraduates (REU) program that runs for 10 weeks each summer. Participating undergraduates work in basic research labs, mentored by Wadsworth faculty, all of whom also have joint appointments with the SPH. The REU program is the only formal summer program that we run; it directly supports ten students per summer, but we also include other undergraduates working in Wadsworth labs in our programming. In the past, Wadsworth faculty have hosted C-STEP students from the University, as well as other local students and students from area colleges and universities."

Opportunities to work with the Wadsworth faculty during the academic year have also been available, apart from the official REU program.

For more information: www.wadsworth.org/reu, and visit their table at the CURCE Fall Fair.
