Awards announcement

Excellence at the Intersection of Science and Life

Life is hard – it can be even harder for those pursuing a degree in one of the STEM fields, but many individuals achieve school/work–life integration by succeeding academically or in their careers without losing sight of other important areas of their life. The Women in Science and Health (WISH) group has established an award to recognize students and postdoctoral fellows who are pursuing degrees and careers in STEM fields and are achieving excellence in their field while also being exemplars in excelling at life.

The WISH award, “Excellence at the Intersection of Science and Life,” is open to students and post-docs of any gender in a STEM field. There will be three $100 awards given, one each at the undergraduate, the graduate (MS/PhD studies), and the postdoctoral level (PhD or other advanced degree).

To apply for the award, please write an essay of up to 600 words on how you have achieved “Excellence at the Intersection of Science and Life.”

Deadline: 20 March 2020

Please upload your essay here:

https://forms.gle/g8we8MRJioV7y7HF9

Please indicate your name, degrees earned or being pursued, field of study, gender, and if you grant permission for your essay to be printed/published if it is selected as a winner at the upload site.

Sponsored by Women in Science and Health (WISH): https://www.albany.edu/wish/
